2. Alphabetical listing by vehicle make

The makes listing on page 48 shows you where you can find the make you are looking for.

 In this column you will find the name of the make and various models. The models are arranged in alphanumerical order under each make. Engines are listed from smallest to largest based on engine capacity. Diesel engines are always listed at the end of each model range.

 Model years are listed in this column from oldest to newest.

 Engine Kilowatt and (horsepower) are given in this column.

 As changes in engine types have an effect on the drive system product to be used, the engine type or code listed in this column will help you to identify the correct items required.

 The application of the drive system product is indicated here. Abbreviations used in this column are explained in a separate booklet included in this catalogue.

 A symbol for the type of product and more detailed information on the vehicle, such as motor number, restrictions on the model year or exceptions, are given in this column. In some cases, a letter-number combination occurs on the right hand side. This note, which is also explained in the separate booklet, gives extra information.
