**PRODOTTO
DEL MESE**

Una questione di **Sicurezza**

Arsauto S.r.l. di Cafasse, da più di trent'anni azienda leader nel settore nella produzione di specchi retrovisori, ha messo a punto il sistema Guardavanti, che garantisce la piena visibilità nelle immediate vicinanze della cabina, anche per i veicoli immatricolati prima del 2007

La normativa europea 2005/27CE, prevede che i veicoli immatricolati dal 26/01/2007 siano dotati di un dispositivo per la visione anteriore e laterale alla cabina, sul lato opposto a quello di guida. Non rientrano, quindi, nell'obbligo i mezzi circolanti antecedenti al 2007, probabilmente perché non si sapeva bene dove montarli, visto che non è consentito forare la carrozzeria. Eppure la piena visibilità durante la guida rimane un fatto di sicurezza per tutti, dall'autista, al camion, agli utenti della strada in generale. Può capitare, infatti, che la visuale dalla cabina non consenta di vedere alcuni ostacoli, dal pedone che attraversa improvvisamente, al muretto basso, all'auto troppo accostata a destra; in città come sulle tangenziali o negli svicoli delle autostrade. Un semplice urto può causare, comunque, danni alla carrozzeria o la rottura del gruppo ottico anteriore, che deve essere immediatamente sostituito, tra l'altro con esborsi notevoli, e, spesso, con difficoltà di reperimento.

◆ **Guardavanti**

Arsauto propone il sistema Guardavanti, che garantisce la piena visibilità nelle immediate vicinanze della cabina, anche quando l'eventuale ostacolo non sarebbe normalmente visibile dal posto di guida. Pensato e realizzato per tutti i modelli di camion prodotti prima del 2007, Iveco, Astra, Volvo, Scania, MAN, DAF, Mercedes

L'eliminazione della zona cieca anteriore permette di evitare ostacoli altrimenti invisibili per l'autista, aumentando notevolmente la sicurezza dei pedoni durante le manovre e nei percorsi urbani

I Guardavanti Arsauto si installano facilmente e in pochi minuti, utilizzando i filetti e la viteria già presenti sulla cabina e sono in vendita a 120 euro circa

e Renault Trucks, il nuovo specchio retrovisore Arsauto si monta utilizzando i fori e i filetti esistenti per l'installazione della visiera parasole e rispetta tutte le direttive attualmente in vigore. Gli specchi retrovisori Arsauto sono regolarmente omologati dal Centro Prove di Roma del ministero delle Infrastrutture e dei Trasporti italiano, nel pieno rispetto delle direttive attualmente in vigore, e sono stati sottoposti a tutti i test per la verifica della copertura dei campi visivi per ogni modello di veicolo per il quale sono stati realizzati. Tutti i prodotti dell'Azienda piemontese, inoltre, vengono prodotti interamente in Italia, con componenti provenienti unicamente dalla Comunità Europea ed è in preparazione un sistema che permetterà l'installazione dei Guardavanti anche sui veicoli non dotati di parasole.
