ContiSys Check.

Compact, powerful,
easy to use.

VDO

VDO

The new diagnostics and service tool from VDO.

System testing on modern vehicles is an increasingly complex task. As each on-board system becomes more sophisticated, the tools required for diagnostics and servicing also have to adapt. That's why we developed the new ContiSys Check – so you're always well prepared.

ContiSys Check is compact, easy to use and offers the advantage of optional software updates. It is a powerful EOBD diagnostics tool for use during check-in, servicing and repair. With its wide range of functions, it is also ideal as a secondary device.

Important:

Once acquired, your software licence is valid indefinitely. You can also continue to use your ContiSys Check without any software updates.

Package includes:

- Hand-held device
- EOBD cable
- USB cable
- Quick start guide
- Documentation CD

The benefits are at your fingertips.

ContiSys Check covers a wide range of everyday diagnostics and servicing tasks. And even when working with the most complex vehicle systems, it's always easy to use.

ContiSys Check is the ideal tool for the following applications:

- Efficient and reliable downloading of ECU data during check-in
- Engine diagnostics during servicing – with more than 20,000 manufacturer-specific fault codes
- Resetting airbag and pretensioner systems – perfect for body shops
- Support for electric parking brakes, ABS/ESP and the Mercedes-Benz SBC system – perfect for brake servicing
- Testing and calibrating tire pressure monitoring systems (TPMS)
- Calibrating VAG DSG transmissions
- Resetting service and oil change interval indicators

ContiSys Check

Multifunctional and always up to date.

The optional ContiSys Update Plus service uses the Internet to ensure that your diagnostics device is always up to date.
