Electronic Signal Flasher kit

Code
EE031H
Our technicians recommend the replacement of the original (OEM) relay with our EE031 in correspondence of the mounting of Rizoma indicators when four indicators are replaced. This will maintain the correct flash rate as the original system albeit with different Wattage. Use of the EE031 eliminates the need to use individual resistors.

⁴ Oil Filler Cap with Dipstick.

⁵ Except models MV AGUSTA® BRUTALE 675 / 800 / F3 675.

⁶ Except models YAMAHA® MT-03 / XJR.

It's a good practice to fasten the engine oil filler cap with a safety wire.
RIZOMA engine oil filler caps come with a removable bracket for the safety wire.

MACHINED FROM BILLET ALUMINIUM | ANTI-TAMPERING KEY LOCK SYSTEM
FAST AND EASY MOUNTING | BI-COLOR FINISH

KEY LOCK SYSTEM

The Key System effectively tamperproofs the cap while maintaining ease of installation and use. Even the key makes a style statement and can function as a key fob.

DYNAMIC BRAKE LIGHT SENSOR

The Rizoma Dynamic Brake Light Sensor DBL001, is an accelerometer, which aims to inform the rider that follows, through a intermittent signal, the bike that precedes it is under sudden deceleration.

The DBL001 is connected to the rear light of the bike or to our three functions indicators (position, indicator, stop): FR155, FR165, FR125.

The functionality of the Dynamic Brake Light sensor is activated by a sudden braking: the stop light illuminates intermittently with a frequency of 4 Hz (4 flashes per second). The flashing continues during the braking phase for 4.5 seconds before to come back to normal rear light.
