## SECTION 4: FIRST AID MEASURES

### 4.1. Description of first aid measures:

#### INGESTION:

Measures:

- The product is supplied in an aerosol bottle, so it is unlikely to be swallowed.
- In case of accidental ingestion, do not induce vomiting.
- Immediately seek medical advice.

#### INHALATION:

Measures:

- Take the victim into fresh air and keep at rest.
- In case of respiratory tract irritation (cough) or difficult breathing, call a doctor immediately.
- If respiratory arrest occurs, a qualified person should provide artificial respiration, or use cardiopulmonary resuscitation in case of cardiac arrest.
- A qualified person may give oxygen, preferably based on medical advice, which may be beneficial.

#### SKIN CONTACT:

Measures:

- Immediately remove the contaminated, soaked clothes.
- Wash the skin with plenty of lukewarm running water and soap.
- Do not attempt to warm the affected skin area on site. Do not rub or apply dry heat.
- Carefully trim the part of the clothes that adheres to the wound.
- Loosely cover damaged surfaces with a sterile cloth.
- Transport the injured person to a first aid centre or hospital as soon as possible.

#### EYE CONTACT:

Measures:

- In case of contact with eyes flush thoroughly with water holding eyelids apart and moving the eyeballs (for at least 15 minutes).
- Remove contact lenses, if present and easy to do.
- Cover both eyes with a sterile cloth and consult a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed:

In high concentrations it can be choking, can cause suffocation, and lack of oxygen can have fatal consequences (propellant data).

**Hydrocarbons, C<sub>10</sub>-C<sub>13</sub>, n-alkanes, isoalkanes, cyclics, <2% aromatic (CAS: 64742-48-9):**

Inhalation: May cause respiratory irritation. When inhaled, it is absorbed from the lungs, causing drowsiness and dizziness.

Skin contact: Prolonged exposure may cause skin dryness or cracking.

Eye contact: May cause eye irritation.

Ingestion: May irritate the gastrointestinal tract. Fluid droplets entering the lungs can cause pulmonary edema, pneumonia, which can be fatal.

### 4.3. Indication of any immediate medical attention and special treatment needed:

Show the safety data sheet or label to the doctor if possible.

In case of ingestion, the development of pulmonary edema and pneumonia may be prolonged, the injured person should be monitored.

## SECTION 5: FIREFIGHTING MEASURES

### 5.1. Extinguishing media:

#### 5.1.1. Suitable extinguishing media:

Water spray, extinguishing powder, foam, carbon dioxide.

#### 5.1.2. Unsuitable extinguishing media:

Strong water jet. (Only applicable for cooling containers.)

### 5.2. Special hazards arising from the substance or mixture:

Extremely flammable aerosol. The heat of the fire can cause a rapid increase in pressure inside the container and it can explode.

In case of fire, smoke and other combustion products (CO, CO<sub>2</sub>, various hydrocarbons, organic acids) may be formed; the inhalation of such combustion products can have serious adverse effects on health.

Due to the aerosol formulation, large spills of the mixture are unlikely.

The gas can form an explosive mixture with air.

**5.3. Advice for firefighters:**

Wear full protective clothing and self-contained breathing apparatus.

The area must be evacuated.

Extinguish fire from a safe distance or sheltered location.

Avoid inhalation of hazardous vapours and toxic decomposition products (approach from the wind). The best way to extinguish a fire with flammable gases is to stop the gas leak before starting the extinguishment.

Personnel and products not yet endangered by fire must be secured.

Cool the fire affected containers with water spray.

The extinguishing water should not be allowed into the environment.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

**6.1. Personal precautions, protective equipment and emergency procedures:**

**6.1.1. For non-emergency personnel:**

Allow only well-trained experts wearing suitable protective clothing to abide in the field of accident.

**6.1.2. For emergency responders:**

Unauthorized persons must be kept away.

Remove all sources of ignition.

Ensure adequate ventilation.

Avoid contact with skin and eyes.

Do not breathe vapor / spray of the product.

Wear full protective clothing and self-contained breathing apparatus.

**6.2. Environmental precautions:**

Release of larger quantities is not likely (aerosol can).

If the spilled product (propellant) enters the sewer system, there is a risk of explosion.

All deeper and more distant ignition sources must be eliminated.

Dispose of the spillage and the resulting waste according to the applicable environmental regulations. Do not allow the product and the resulting waste to enter sewers/soil/surface or ground water. Notify the respective authorities in accordance with local law in the case of environmental pollution immediately.

**6.3. Methods and material for containment and cleaning up:**

Stop leakage if this can be done without risk.

Use water spray to reduce gas concentration.

Close down the danger zone, until the gas vanishes.

Dispose of in accordance with local regulations.

Use only non-sparking tools.

**6.4. Reference to other sections:**

For further and detailed information see Sections 8 and 13.
