**SUITABLE EXTINGUISHING MEDIA:**

The extinction equipment should be of the conventional kind: carbon dioxide, foam, powder and nebulised water.

**EXTINGUISHING MEDIA WHICH SHALL NOT BE USED FOR SAFETY REASONS:**

None in particular.

### 5.2 Special hazards arising from the substance or mixture

**HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE:**

Do not breathe combustion products (carbon oxide, toxic pyrolysis products, etc).

### 5.3 Advice for firefighters

**GENERAL INFORMATION:**

	<b>SAFETY DATA SHEET</b> per (EC) No 1907/2006 (REACH)	Page 3/7
	Product name:	Issued: 1.7.2014
	<b>Mounting compound FERMONT BLUE</b>	Revision: 1

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

#### SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS:

Hardhat with visor, fireproof clothing (fireproof jacket and trousers with straps around arms, legs and waist), work gloves (fireproof, cut proof and dielectric), a depressurised mask with facemask covering the whole of the operator's face or a self-respirator (self-protector) in the event of large quantities of fume.

## 6. Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Use breathing equipment if fumes are released into the air.

### 6.2 Environmental precautions

The product must not penetrate the sewers, surface water, ground water and neighbouring areas.

### 6.3 Methods and material for containment and cleaning up

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4 Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## 7. Handling and storage

### 7.1 Precautions for safe handling

Store in closed, labelled containers.

### 7.2 Conditions for safe storage, including any incompatibilities

Normal storage conditions without particular incompatibilities.

### 7.3 Specific end use(s)

Information not available.

## 8. Exposure controls/personal protection

### 8.1 Control parameters

Information not available.

### 8.2 Exposure controls

As the use of adequate technical equipment must always take priority over personal protection equipment, make sure that the workplace is well aired through effective local aspiration or bad air vent.

#### HAND PROTECTION:

Protect hands using work gloves (see standard EN 374). We recommend applying protective hand cream. The following should be considered when choosing work glove material: degradation, breakage times and permeation. Work glove resistance to preparations should be checked before use, as it can be unpredictable. Gloves' limit depends on the duration of exposure.

#### SKIN PROTECTION:

Wear overalls with long sleeves and professional safety footwear (see standard EN 344). Wash with soap and water after removing protective clothing. Wash clothing before reuse.

#### RESPIRATORY PROTECTION:

Not prescribed.

#### EYE PROTECTION:

Wear sealed protective goggles with side shields (see standard EN 166).
